## **1. Are you interested in space?**

- Yes, I am really interested in space. I enjoy learning about stars, planets, and astronauts.

## **2. What can you see when you look at outer space?**

- When I look at outer space, I can see shining stars, the bright moon, and sometimes planets like Mars. I also see celestial objects if I look through a telescope, like nebulas and galaxies.

## **3. Can you talk about our solar system?**

- Our solar system has the sun, eight planets, and many moons. The Earth is one of the planets that goes around the sun.

## **4. Would you like to explore outer space?**

- Yes, I would love to explore outer space. It would be exciting to see the stars and planets up close.

## **5. If you could go to outer space, who would you go with?**

- If I could go to outer space, I would go with my best friend. We would have a great adventure together.

## **6. Do you believe in astrology?**

- No, I do not believe in astrology. I think it is just for fun and not real science.
- Yes, I do believe in astrology. I think it's interesting to read about star signs and how they might have effect on our lives.

**Mercury:** is the closest planet to sun. it's a rocky planet.

**Venus:** is the second planet in solar system and it's a rocky planet.

**Earth:** is our home and it is rocky as well. It's the only habitable planet.

**Mars:** fourth planet, it's rocky and it might be habitable in the future.

**Jupiter:** It's the biggest planet in our solar system. It's a gas giant.

**Saturn:** Another giant gas is saturn. It has got a big ring around it.

**Uranus:** uranus is the third largest planet and they call it ice giant. because it's covered with ice.

**Neptune:** it's the last planet in our solar system. and it's coldest too. It looks like uranus.

**Pluto:** in the past people thought it's a planet too, but later scientists said it's a dwarf planet.

A rocky planet is made of rock.

Gas giant is a planet that is made of gas
